### Prerequisites (required courses and introductory requirements)

- **Required courses**: Basic knowledge of micro- and macroeconomics and international economic relations
- **Introductory requirements**: Competences in respect of economic modelling, statistics and readiness to get involved in research projects.

### Assessment method, forms and criteria

- **Assessment method**: Course completion (graded)
- **Assessment criteria**: Esej zaliczeniowy

### Course objectives

#### Knowledge

The course shall give students an advanced knowledge of the European economic integration as a part of the world economy. The course aims to prepare students for their future careers and enabling their personal development, creating and maintaining a broad, advanced knowledge base and stimulating research and innovation in the area of international economics.

#### Skills

The most important are research competences in the field of European and international economics.

#### Attitudes

Readiness to carry on research and work with students and academics

### Course contents

1. The stages of economic integration, theory and practice
2. Economic analysis of market integration in the EU (products, services and factors of production)
3. Common commercial policy and external relations of the EU
4. European common policies (competition policy, common agricultural policy, industrial policy)
5. Economic and Monetary Union and the European Central Bank
6. European macro-economic cooperation and strategies for growth and employment

### Recommended reading lists

Supplementary literature:

2. Five Years of the EU Eastward Enlargement. Effects on Visegrad Countries: Lessons for the Future, ed. by E. Kawecka-Wyrzykowska, Warsaw School of Economics, 2009
